

Dispomat Automatic Peristaltic Dispenser

DISPOMAT peristaltic Dispenser is a microprocessor controlled automatic fluid dispensing instrument. DISPOMAT has 4 peristaltic pumps and can therefore dispense both diamond suspension / lubricating fluid and aluminium oxide / colloidal silica suspension. Dispensing parameters such as fluid selection, frequency and dispensing time can be set. High quality peristaltic pumps guarantee exactly the same dosing every time, saving time and consumables. No vaporisation or spray mist occurs.

Specification

- Microprocessor controlled
- 4 peristaltic pumps
- 3 pumps for diamond suspension / lubricating fluid
- 1 pump for aluminium oxide / colloidal silica
- Front panel with touch pad controls
