

Servocut M300 Manual Cut Off Machine

SERVOCUT M300 is a medium size, bench top, manual cut off machine, with a cutting capacity of 90/100mm with cut off wheel diameter of 250/300mm. It has manual positioning of the specimen in X, Y and Z axis (X axis optional).

SERVOCUT incorporates manual chop cutting and manual table feed cutting. It consists of a cast aluminium base on which the motor and the working space are provided in the form of two separate housings. A large window and sealed 12V lamp in the cutting chamber allow precise observation of the cutting process. A large slotted feed table can accommodate a variety of different clamping devices. The feed table provides a long travel depth making it ideal for cutting long or deep samples in a single pass. Cooling water recirculation is standard – 2 water jets located on both sides of the cut off wheel and 2 jet sprays towards the specimen. Supplied without clamping device
