Kemet W2 Diamond Slurry

Kemet W2 Diamond slurry is an excellent water-based slurry for precision lapping and polishing applications

- Low viscosity to give optimum stock removal
- Parts easier to clean after lapping and polishing
- Available with Monocrystalline or Polycrystalline Diamond Powder
- The finely graded diamond powder ensures the generation of perfect surface finishes
- Available in micron sizes 0.1 to 45 micron
- Suitable for use on all types of Kemet Lapping and Polishing Plates and Polishing Pads
- Supplied in 400, 2.5 l and 3.8 l bottles
- Environmentally friendly and not classified as an atmospheric pollutant with Volatile Organic Content (VOC) = 0 g/l

If a lubricating fluid is required Kemet Type W2 is recommended.
